To my wife, Cherish.

Thanks for not making me

choose between you and my hobbies.
Even better, thanks for embracing them.
To the hundreds who have helped this effort along the way:

thank you. From the Rock's, Hulk Hogan's, and Triple H's

who have retweeted me, to those who emailed results, to

those who contributed financially, it's all played an

essential role in making this project successful.

FORWARD

When I was young, not long after discovering the unbelievable world of professional wrestling, I impatiently waited each month for t he latest issue of Pro Wrestling Illustrated to show up at my local bookstore.
It wasn’t so much for the pull-out poster or whatever the cover story was, though I appreciated those as well. It was for the arena reports -

the collection of televised and non-televised events held all around the world in the the previous few weeks.

If you became a wrestling fan prior to the Attitude Era or Monday Night Wars, you’ll understand the appeal of reading line by line about all the big matches that occurred when the live Monday Night Raw went off the air, or in locations where there were no camera cre ws at all.

It was an era in which there wasn't monthly pay-per-view events and the main draw was the live experience, not TV ratings. Matches with big name talent weren’t given away, they were sold. And if you didn’t buy a ticket, you missed out.

In 1993, the first full year I was knee-deep in all things pro wrestling, Mr. Perfect fought Shawn Michaels once on television. And it was at Summer Slam. But the two wrestled nearly every day from April to August. You just didn't see it unless you bought a ticket. I was fortunate enough to have bought two of those tickets (both had better finishes than Summer Slam).

Same goes for Bret Hart and Lex Luger. One of the top WWF feuds coming out of WrestleMania IX transitioned out before it made it to TV.

But, again, they wrestled each other almost every day for several months. Luger even picked up a pinfall or two along the way, using his controversial steel-plated forearm.

In my childhood, I would take the magazine and individually cut out the brief recaps of WWF and WCW house shows, any of which offered the talent and matches to double for a pay-per-view at that time.
Fast forward nearly 10 years.

With the onset of the Internet, information about pro wrestling was more accessible to the average fan than ever before. And events like the Montreal Screwjob, which pulled the curtain back to reveal the inner workings of the industry, stirred up a brand new wave of half truths, rumors and lies. So, to set some records straight, I set out to search for an online resource on the house shows and TV tapings that filled up my wrestling magazines as a kid.

Imagine my surprise when those resources didn't exist.

And so, with a little ambition and a lot of curiosity, I created the resource.

I never planned for TheHistoryofWWE.com to become globally known. At first, I started researching and compiling information simply for my own benefit. I wanted to know how busy the road schedule was in 1993. I wanted to know how successful the WWF and WCW were in battleground cities like Baltimore and Philadelphia. I wanted to know about the try out dark matches that opened doors for so many future superstars.

In time, as the research grew, so did the audience. And it wasn't long before fans from literally all around the globe - from the UK and mainland Europe

to Canada and Australia - contacted me with their own information to add.

As I write this, the website is approaching its twelfth birthday. It has grown to include the entire run of the WWE dating ba ck to the inception of the WWWF name in 1963. It has expanded beyond its namesake to host Crockett, WCW and ECW results. And it has most recently added results from Smoky Mountain Wrestling as well as modern organizations like Total Nonstop Action and Ring of Honor.

The results go beyond a winner and a loser. If known, the time of the fall, managers at ringside, outside interference and the finish are all included. Every new effort has deepened my love for the wrestling industry. I've learned so much the past 12 years and I've made so many close friends and relationships through this work.

What you now hold in your hand is a labor of love more than a decade in the making. I could not come close to estimating how many hours of footage I've watched, newsletters and magazines I've read, facts I've confirmed or money I've spent to keep the process going; but this is the result.

I hope you enjoy reading this as much as I've enjoyed compiling it. And I hope it also deepens your passion for this fascinating industry.

INTRODUCTION

Work on a project like this for 12 years, and you'll come across things every so often that will consume

your curiosity.
The kinds of things that make you want to keep digging.
In respect to the 1960s, 70s and 80s, I can name plenty of tidbits that have done that for me. In the

pages ahead, you may find many others.
Did you know…?
While Buddy Rogers was recognized as WWWF World Champion for the better part of 4 months, he

wasn’t presented with the title belt until mere weeks before his title loss to Bruno Sammartino? The WWWF was operated as a territory in the northeastern United States. But in the days before a

national or global audience, it was not uncommon to see the heavyweight champion in Japan, Canada,

Florida, Nashville, Indianapolis, or California. And he would often bring his belt to defend against the local star.
Bruno Sammartino was “defeated” for the heavyweight crown a few times by the likes of Gorilla

Monsoon, Ray Stevens and Prof. Tanaka. The title was returned on a technicality.
WWWF action aired on HBO as early as 1973. Top names like King Kong Bundy, Curt Hennig, Jim Duggan, Eddie Gilbert, and Mick Foley all had their

start on TV as enhancement talent during the timeframe of this book.

Many marquee matches at TV tapings never saw the light of day in the U.S. but some were later

televised exclusively in Europe or Canada. During the expansion of the 1980s, fans of other wrestling organizations didn't always appreciate the

WWF product when it debuted in their area. Often, even with Hulk Hogan on the card, hosting events in a

new part of the U.S. was not an immediate success when it came to attendance.
And there are countless others I'm sure you'll come across.
What you'll read in the coming pages is not 100 percent every show, with every match on the card. It

may be that only one wrestler or one match is known to have been on the show. But it's the most

complete listing in existence. Hopefully, in time, I'll discover more info to help fill in some of the

blanks.

- 1/25/63: The World Wide Wrestling Federation

(WWWF) was formed when promoters in the

Northeast refused to acknowledge Rogers' onefall loss of the NWA championship. The real

reason was that Vince McMahon Sr. wanted to

keep Rogers on as his territory's champion since

so much money was being made from his title

run. Rogers continued to wrestle as the "world

champion" in the Northeast region and was

recognized as the "WWWF World Champion"

starting in April.
